

Installation Instructions

Wireless UltraBright Motion Sensor LED Path Light

MB592

Thank you for purchasing the Mr. Beams™ UltraBright Path Light. We are committed to eliminating darkness using the latest in Light-Emitting Diodes (LEDs). LEDs are the most efficient and durable light sources available. We are certain that your light will contribute to a safer environment and provide light where you need it at a very reasonable cost.

What is included:

- 2 Motion Sensor Path Lights
- 2 Stakes

What you need to install:

- 4 C-Cell Alkaline Batteries (per light)

Path Light Features:

Motion/Light Sensor: The Path Light instantly turns on when it detects motion from up to 10 feet away. The light sensor conserves battery life by preventing the light from activating in daylight.

Auto Shut-off: Path Light shuts off automatically after 30 seconds if no motion is detected.

Bright LED: 80 Lumens covers up to 180 sq ft.

Durable, Weather Resistant: Tight seals and UV resistant material allow the light to work in all weather conditions.

Tips:

- Use only new alkaline C-Cell batteries with 1.5V rating.
- Do not mix old and new batteries. If batteries are not new, it may cause the light to malfunction.
- Install batteries with polarity in correct position.
- Light may activate when batteries are inserted. Simply take light into a dark room, allow batteries to settle, then test activation.
- **If your light will not turn off, it means that it is time to replace the batteries.**

NOTE: Light sensor only allows light to activate in darkness. We recommend you test in a dark room or closet.

Battery Installation

Mounting with Stake

Battery Caution:

- 1) Do not mix old and new batteries
- 2) Do not mix Alkaline, Standard (Carbon-Zinc) or Rechargeable (Nickel Cadmium) or (Nickel Metal Hydride) batteries
- 3) Do not dispose of batteries in fire
- 4) Batteries should be recycled or disposed of as per state and local guidelines
